

About It

Koffee Brown

Paint no way
You know it's on me baby
All eyes, all eyes on you
Just know you been made
Wish I could say you with me
I need you right here, right now
I need to know you somehow
On some seductive shit
Oh I really love this shit

It's just you and me
Watching you while you watching me
Are we in too deep?
You're turning me on how you talking to me

She's all about it
Know she's all about it
She not talking 'bout it
'Cause she's all about it
He be all about it
When he talks about it
Make me all about it
He be all about it

Smoking make it better
Drink, I'll make it better
Sex'll make it better
Take me new for better
I'ma shake what you make it, just want babe
Sweat, meet a lover with no end
I'll play it forward, you deepening
You feeling easy

It's just you and me
Watching you while you watching me
Are we in too deep?
You're turning me on how you talking to me

She said don't talk about it, be about it
I mean even that's a pea, you know I'm 'bout it 'bout it
Other chicks, small jewelry, can't see us clouding
You're a diamond in the rough, hard as a medallion
Baby I been watching
Since you stepped foot in the club I been plotting
On the dancefloor, put your back then you drop it
You dealing with a winner, now losing ain't an option
Give it to you raw, I'm a [?] stopping
Love when you talk dirty, since a rascal I been rotting
Now my spot or your crib? Where we at with it
It don't matter, when we done, you gon' act different

She's all about it
Know she's all about it
She not talking 'bout it
'Cause she's all about it
He be all about it
When he talks about it

Make me all about it
He be all about it
