

Needles & Blades

Koffin Kats

well i was drivin' late at night in the backwoods upstate
slammin' down a beer as the radio played
the next thing i knew the ol' truck had gone dead
i heard a roar of thunder, a light up ahead
and there all around me were little green men
dressed up like doctors with the wickedest grins

psycho creatures from outer space
dressed in white with needles and blades
well it gives your body hives
they'll drill into your brain to corrupt your mind
your under their command
well they'll send you straight to hell bring you back again

well they put me in a room and they drugged me to sleep
i woke up on a table with 'em cuttin on me
sawin' on my chest and a drill to the head
i know this aint a dream the blood is so red
i taste it in my mouth and it pours from my head
they dig through my organs and take pieces of hell

psycho creatures from outer space
dressed in white with needles and blades
well it gives your body hives
they'll drill into your brain to corrupt your mind
your under their command
well they'll send you straight to hell bring you back again

foaming at the mouth
i'm bleeding from my eyes
i'm shaking all around
i only want to die
it started way up here
way out in outer space
i know this is the end
i'm trapped here in this place
well psycho creatures from outer space
blood tapped me and test my brain
tear me up with needles and blades
stitch me back together again

i took a scalpel to my wrist now i'm fading away
i stole it from the table where the instruments lay
experiments of torture and my body is drained
it's the only way out of the laboratory
and when they come back down to take me away
they'll find me all bloody with a smile on my face

psycho creatures from outer space
dressed in white with needles and blades
well it gives your body hives
well they drill into your brain to corrupt your mind
your under their command
they'll send you straight to hell bring you back again

foaming at the mouth
i'm bleeding from my eyes

i'm shaking all around
i only want to die
it started way up here
way out in outer space
i know this is the end
i'm trapped here in this place
well psycho creatures from outer space
blood tapped me and test my brain
tear me up with needles and blades
stitch me back together again
