

## Curse October

Kolby Cooper

I still remember that October day  
It was hot like you never liked, the sun beatin' on my face  
The doctor told us it'd be the one to take you away  
We went to bed that night, knowin' our lives'll change  
And I still remember wakin' to the news  
Boys your daddy's gone, come say goodbye for good  
I cried all my tears, went back to my room  
I shut the door hit the floor askin' God why you

Curse October for makin' me grow too fast  
Like most things in life the good ones never last  
People say he died to young, I can't say I disagree  
Curse October for takin' you from me

Never knew depression like I did that year  
14 and a lot to learn, wishin' you were here  
Just needed to talk for a minute or two  
But I couldn't go by that stone it put me in a bad mood

Curse October for makin' me grow too fast  
Like most things in life the good ones never last  
People say he died to young, I can't say I disagree  
Curse October for takin' you from me

Everywhere there's somethin' to remind me of you  
Like this truck I drive and to tell you the truth  
It gets better everyday  
But it's still hard as hell and that's somethin' that won't change

Curse October for makin' me grow too fast  
Like most things in life the good ones never last  
People say he died to young, I can't say I disagree  
Curse October for takin' you from me

Curse October for taking you from me  
Yeah curse October for takin'  
For takin' you from me
