

Lost Gets Found

Kolby Cooper

What is time?
Another day
It's almost noon and I ain't seen your face
But you and me equals us
So let 'em try, it don't have to add up

I always knew I'd touch the moon
Just never thought it'd be with you
But look at us, living proof

Lately, I don't need no room to breathe, no
Baby, the fire I feel is just too real
It's hard to even wrap my head around
The lightning rattling my bones right now
Maybe life comes around and all that's lost gets found
Life comes around and all that's lost gets found

There must be somebody
Behind the scenes just pulling strings
What power, what mystery
Saw a future in our history?

Lately, I don't need no room to breathe, no
Baby, the fire I feel is just too real
It's hard to even wrap my head around
The lightning rattling my bones right now
Maybe life comes around and all that's lost gets found

I always knew I'd touch the moon
Just never thought it'd be with you
But goddamn, we're living proof

Lately, I don't need no room to breathe, no
Baby, the fire I feel is just too real
It's hard to even wrap my head around
The lightning rattling my bones right now
Maybe life comes around and all that's lost gets found
Life comes around and all that's lost gets found

Life comes around and all that's lost gets found
