

## Cold Storm

Kollegah

(Cold storm, it's a cold storm)  
(Attack and I'm makin' 'em all fall before dawn)  
(Thunderbolt strong, make 'em freeze like a blizzard)  
(All I leave when the twister hits, just some bare bones)  
(Cold storm, it's a cold storm)  
(Attack and I'm makin' 'em all fall before dawn)  
(Thunderbolt strong, make 'em freeze like a blizzard)  
(All I leave when the twister hits, just some bare bones)

Sniper lasers in your face right before the headshots  
You become Ed Sheeran with that face full of red dots  
Six-fifty Maybach, all the extras  
Wavin' like the president, followed by some black trucks  
I got a loyal team full of loyalty  
Always makin' sure I keep on cashin' in my royalties  
As they see me gettin' richer, they be cheerin' joyfully  
I do not forget their share, I reward 'em royally  
Leave your harvest but don't leave your people starvin'  
You get fucked when you're selfish like a seafood market  
To my brothers in freedom and to those servin' time  
We use the book of God to bet against world of lies  
Full of political puppets, speakin' at vague terms  
The stronger the propaganda, the weaker the brain works  
It's an insane world  
People fall of false prophets like an investigation on one of my fake firms  
Mozart is my culture  
I'm slaughterin' these vultures  
Dip 'em in the fountain with that water spittin' sculpture  
Put the gun off my shoes  
Put the steal on your back like a samurai sword  
Side motion, I came back from golfin'  
A servant gave me potion, I killed him with no emotion  
Left his body floatin', dead in the ocean  
With a hole in his whole head like a dolphin

Cold storm, it's a cold storm  
Attack and I'm makin' 'em all fall before dawn  
Thunderbolt strong, make 'em freeze like a blizzard  
All I leave when the twister hits, just some bare bones

It's a cold storm and it's striking  
I'm a white king lookin' like a Viking  
Semi-automatic in a black sweater  
Vendetta, hit the road like a jackhammer  
Forgive me, Lord, I live the life of a G  
I got mouths to feed, people dependent on me  
As we enter the scene, all our enemies flee  
V.I.P. full of bitches like your family tree  
It's a cold storm, not a calm breeze  
Money over bitches since the 90s  
While you were hangin' out on dates like your palm leave  
I was on the grind, cold-hearted like Stalin  
With a crew out there robbin' in the dark night

Partners in crime like Robin and the Dark Knight  
Nothin' but the starlights above us  
Who is your brother in the hard times? Makaveli, thug life  
AK-47 in a violin case  
You will not get on eye level like my designer shades  
See, my diamond chain got your bitch attracted  
Better hide away that booty like a pirate cave, I'm  
Throwin' stacks in the fireplace  
Enemies acting kinda brave  
I feel like throw 'em off the yacht and let the giant wave be their silent g  
rave

Cold storm, it's a cold storm  
Attack and I'm makin' 'em all fall before dawn  
Thunderbolt strong, make 'em freeze like a blizzard  
All I leave when the twister hits, just some bare bones
