

Cosmic Girls

Kontrust

Hey all the girls were made
By a cosmic girl, be aware she's out there to save the day
Hey all the girls were made
By a cosmic girl, beauty hits like a gun when it looks your way

Holding my breath - oh here she comes
Escape from death - or we are done
Under her command - I do belong
Gotta get on board - wanna travel along
The decision's made - won't turn out to be wrong
Yeah a little afraid - just makes me strong
One ride I take - won't be for fun
I am a soldier made - by starship one

Hey all the girls were made
By a cosmic girl, be aware she's out there to save the day
Hey all the girls were made
By a cosmic girl, beauty hits like a gun when it looks your way

Are we finally ready to join her universe
She will come and teach us how to cure the curse
We are strong and fearless
Out of reach
Let's be cosmic women! - make this our creed

Sound the master alarm - save the universe
Using cosmic charms - that are only hers
Can stop her reign - once it's begun
I am a soldier now - on starship one
We are a soldiers now - on starship one

Hey all the girls were made
By a cosmic girl, be aware she's out there to save the day
Hey all the girls were made
By a cosmic girl, beauty hits like a gun when it looks your way

Soldiers get on board, get in rows, align to frontlines!
Waiting for my predefined sign just seems so fine
Align for combat! Come - combine to frontlines!
You girls - brave and mine - come on give your guns a bright shine
Outer space - alright - despite the world is outta sight
Might be a fight-night - cruisin' with the speed of light
Ignite the bright white tight gunfire light!
Speed of light - speed of light - keep - keep the flag high!
