

Place For Us

Kool & The Gang

Thoughts of you were in my dreams last night
There we were, the two of us in love
Making plans for the future
Let me tell you what I saw

There's a star shining, oh, so brightly
Gives us hope and strength for us to grow
There's a place where prayers will be answered
One day we will know

I see a place just for us in the end
There is a place you can depend
As long as love is in our hearts
There is a place just for us
There is a place just for us
There is a place just for us

There's a little one who's growing fast now
Keeps us smiling and always on the go
We give love and we show how much we care
One day we will know

I see a place just for us in the end

There is a place you can depend
As long as love is in our hearts
There is a place just for us
There is a place just for us
There is a place just for us, oh, yeah

(There is a place just for us)
I can see it now
(There is a place just for us)
There's a place just for us
(There is a place just for us)

If love is in our hearts
(There is a place just for us)
One day we will know
(There is a place just for us)
There is a place just for us

As sure as the stars shine above
(There is a place just for us)
(There is a place just for us)
There will be a place
There is a place just for us
