

# All We Needed

Koven.

All we had and all we lost  
All in time to speak to us  
Heaven knows at least that we tried  
Holding on to little things  
'Cause we can't forget the better days  
Playing on repeat in my mind

We see the world in a cold light  
It isn't much but it's all we needed  
It's all we needed  
With everything in its right place  
Don't push away 'cause it's all we needed  
To come crawling back to me

To feel our dreams awake  
To feel our dreams awake  
To feel our dreams awake  
(Don't ya get it, don't ya get it, don't ya?)

Stop giving to yourself  
We can have it all again  
We can have it all again  
Stop pushing me away  
We can have it all again  
We can have it all again

We see the world in a cold light  
It isn't much but it's all we needed  
It's all we needed  
With everything in its right place  
Don't push away 'cause it's all we needed  
To come crawling back to me

To feel our dreams awake  
To feel our dreams awake  
To feel our dreams awake  
(Don't ya get it, don't ya get it, don't ya?)

Stop giving to yourself  
We can have it all again  
We can have it all again  
Stop pushing me away  
We can have it all again  
We can have it all again
