

# Get This Right

Koven.

Roll down the window of this car and let me stare out to the sun

This is where it all begun

Climb up the ladder of this thing that we call love

Trying to get up to the top without a slip

But reality is cruel, sometimes we can't have it all

We may find and we will fail, but we can try again

Sometimes life will allow the sun to shine

But when we're sitting in the dark we feel the worst

Cause we're not meant to get it right the first time

We're not meant, to get this right

And while we're waiting for our moment to shine

We should realise - we're not meant to get this right

We're not meant to get this right

(Whoa)

(Whoa)

It's like it doesn't matter, what happened yesterday

We can move on anyway and start fresh

The past lives behind us, there's no need to turn around

'Cause it's all right here and now and looking on

Cause we're not meant to get it right the first time

We're not meant, to get this right

And while we're waiting for our moment to shine

We should realise - we're not meant to get this right

We're not meant to get this right

(Whoa)

(Whoa)
