

## Good Enough

Koven.

Standing up too high  
With nowhere to fall down to  
Empathy around you  
Instead of looking back  
You heard it all before now  
Losing what you didn't know you had  
Fear it, what you want is near it  
But you're really trying  
To get away from it  
Basic instincts overpowering  
You still have this owing  
When this could be good enough for us

This could be good enough for us  
This could be good enough for us  
This could be good enough for us  
This could be good enough for us

This could be good enough for us  
Fear it, what you want is near it  
But you're really trying  
To get away from it  
Basic instincts overpowering

You still have this owing  
When this could be good enough for us  
And I don't have a chance now  
This could be good enough for us

Standing up too high  
With nowhere to fall down to  
Empathy around you  
Instead of looking back  
You heard it all before now  
Losing what you didn't know you had  
Fear it, what you want is near it  
But you're really trying  
To get away from it  
Basic instincts overpowering  
You still have this owing  
This could be good enough for us

This could be good enough for us  
When this could be good enough for us  
And I don't have a chance now  
This could be good enough for us
