

# Lasting

Koven.

Feel what's left on the outside  
Push away and we'll start again  
Feel the distance you made me walk this ground  
And fade

Oh it could be different this time  
So don't say a word  
Oh you cast your shadow into your eyes

Feel my touch getting colder  
Keep my side but I'll lose my way  
Close your eyes and pretend that this life should never change

So don't say a word  
So don't say a word

(Don't say a word)

We'll put up our hands  
To undo these plans  
We've come all this way  
And always know in this life  
This life

We'll never change

We'll put up our hands  
To undo these plans  
We've come all this way  
And always know in this life  
This life

We'll never change
