

## Make It There

Koven.

You're the reason why  
From the other side  
I wanted you in my time  
Before the lines were drawn  
In this world of ours  
I'll help you fit in my mind

When it's time to get older  
If you can't hope you won't find  
When you lose your fire it gets colder  
We make it there alone

It's bigger than my love  
I wanted you to know  
That I can make this happen  
To Bold to loose control  
To proud to let this go  
Although we made it this far
