

# Nervous System

Koven.

I was driving by your house  
Said I wouldn't do it again  
I think about you til I pass out  
It hurts like hell when  
I wake up all alone in my bed  
I'm looking at you only in a mem  
I should be ok  
When I see your face it's like

You got me in my nervous system  
My nervous, my nervous system  
You got me in my nervous system  
My nervous sys... nervous system  
You got me in my nervous system  
My nervous, my nervous system  
You got me in my nervous system  
My nervous sys... nervous system  
You got me in my...

You got me in my nervous system  
My nervous, my nervous system  
You got me in my nervous system  
My nervous sys... nervous system  
You got me in my...

I know that I can be ok  
Gotta push through this healing  
Was in your hand, but then you had me by the wayside  
Did I ever mean a thing to you?  
I only think about the ending  
A shadow of my former self  
This is my health

You got me in my nervous system  
My nervous, my nervous system  
You got me in my nervous system  
My nervous sys... nervous system  
You got me in my nervous system  
My nervous, my nervous system  
You got me in my nervous system  
My nervous sys... nervous system...

In my, in my, in my...

You got me in my nervous system  
My nervous, my nervous system...

In my, in my, in my...
