

Take It Away

Koven.

Turning love to dust, 'cause we know it can't change
Feeling what we lost, but we still come back for more
Running out of time, but the hands are missing
It's an uphill climb, no more, no more

I seek, you hide, the stars aligned
And we had everything to heel us
No fear, no fight, as we decide
To put the distance back between us

Take it away now
Take it away now
Are you letting this go?
Take it away now
Take it away now
Are you letting this go?

Are you letting this go?
Are you letting this go?

Wondering in its place, how I'm gonna spend my time
Such an open space, so we still come back for more
Leaving it behind, isn't always easy
But how hard we try, no more, no more

I seek, you hide, the stars aligned
And we had everything to heel us
No fear, no fight, as we decide
To put the distance back between us

Take it away now
Take it away now
Are you letting this go?
Take it away now
Take it away now
Are you letting this go?

Are you letting this go?
Are you letting this go?
