

Save Some

Krept & Konan

Listen to me
I be in and out the city every week
Every where I go, people I meet
They all want my time, they all want a piece of me
But she said 'Save some for me
I know you're on the road but when you're coming home
Please save some for me'
Save some for me, for me

If I don't tell you then you'll never know
While you steady on a mission
I don't see no competition
And you perfect from your head to toe
But you never ever listen
You just think it's game I'm spitting
Friends invite you but you never go
Rather stay at home and chill in
But your friends ain't tryna listen
And you certi' you already know
Don't worry 'bout these women
Why you always steady tripping?
Why you acting? Maybe you're not understanding
Understanding, gonna make me do the madting
Gonna make me do the madting
Save some for me, don't blame this on me
You even lying then you change your story

Listen to me
I be in and out the city every week
Every where I go, people I meet
They all want my time, they all want a piece of me
But she said 'Save some for me
I know you're on the road but when you're coming home
Please save some for me'
Save some for me, for me

You keep telling me that I should save some
But I don't know why you don't come and take some
Because I want you now when I'm lying you down
Right here, when I get you right here
Your small waist got me getting ideas
Girl you keep on moaning 'cause you don't like
When I'm busy out here on the roadside
And I know you've got your eyes on me
'Cause your friends keep telling lies on me
But you ain't gotta worry 'bout nothing
No, you ain't gotta worry 'bout nothing
I know you're upset when your display pic's gone
But I don't know why you just let it turn so wrong
But are you gonna stay up?
'Cause you know that I'll save some

Listen to me
I be in and out the city every week
Every where I go, people I meet
They all want my time, they all want a piece of me
But she said 'Save some for me

I know you're on the road but when you're coming home
Please save some for me'
Save some for me, for me
