

Bad Love

Krokus

I see you walking down the street
And I know your exactly what I need
Just a little woman for tonight
I took you to my place and it was right

And now you looking deep into my eyes
Your body is turning away, my mind
If I say I need you today
It's no one but myself to blame

You say baby please want to stay
But I can't give you no one away
The way I loved you must be wrong
But you're the one who turns me on

I see you walking down the street
And I know your exactly what I need
Just a little woman for tonight
I took you to my place and it was right
