

Euthanasia

Kryptor

Unable to move and react
feeling like a bodyless brain
surrounded by computers in a sterile hospital room.
Infestable paralysis
with subconscious still intact
an impendimenting barrier between life and death.
Just let me perish
finish my hell on earth
summon the end
this life is useless!
Unable to act and reflect
begging to come to an end
why had I to be born when I must die like this?
Cannot make the final step
despite I am at death's threshold
sorting out disorder of my sufferance's continuity.
I am dependent on drugs and cold technology
no biology within my body
so cut this existence, terminate my fate
my screams of pain simply ignore!
Why don't you read in my apathic view
why don't you find out what there's to be done
plugg all the wires out, tear out the IVs
so is my instant will, don't hesitate!
Give me that killing injection!
Please let me leave
finish my hell on earth
summon my end!
Euthanasia!
