

Prodigal ways with all life abused  
lack of intelligence, ignorance rules  
exploitation of all world's sources  
devastated planet Earth.  
Institutions meant to prevent  
are giving a fuck about global ecocide  
they betray while you pay  
feed their greed and drown in shit.  
Though small in number they are beating the odds  
in unfair battle and cynic warfare.  
So-called solutions are telling us lies  
to save the nature - only a pretext and alibi.  
Being willess toys in a lobby's game  
green is just the dollar bill, greed is the name.  
Greedpeace!

All they fear is an alternative  
they are regardless suit and tie guys  
moneymakers' organizations  
longing for cash but dealing with filth.  
Pretenders of activity  
holy bastards still aiming higher.  
Catastrophic deteriorations  
progressive mass-destruction.  
Mindless corruption, insane bribery  
bloodstained animals, men gasp for air  
once a blue planet is now swallowed by shades  
they cut its' throat with poisoned blades.  
Greedpeace!
