

Boulder

Krystal Keith

You know just where to strike if you wanna leave a mark on me
You know how to get it right to make sure that I bleed
Nobody else can put me through
The kinda hell that you do

Baby I'm strong and I've always been a fighter
Made it through the rain and I stayed on fire
Got knocked down but I climbed even higher
But none of that matters
Life's gonna kick me over and over
You should be the one to make it all better
The world will throw stones and I brush it off my shoulder
You could throw a pebble and it hit me like a boulder

Shame on you, it's just wrong, 'cause you know that you can cut
that deep
Does it really get you off, the hold you have on me
My heart was yours for the taking
Why'd you have to go and break it

Baby I'm strong and I've always been a fighter
Made it through the rain and I stayed on fire
Got knocked down but I climbed even higher
But none of that matters
Life's gonna kick me over and over
You should be the one to make it all better
The world will throw stones and I brush it off my shoulder
You could throw a pebble and it hit me like a boulder, oh

Nobody else can put me through
The kinda hell that you do

Baby I'm strong and I've always been a fighter
Made it through the rain and I stayed on fire
Got knocked down but I climbed even higher
But none of that matters
Life's gonna kick me over and over
You should be the one to make it all better
The world will throw stones and I brush it off my shoulder
You could throw a pebble and it hit me like a boulder, ooh
