Fall To Pieces

Krystal Meyers

All the twisted lies and All the empty promises that let me down All this time I've compromised And tried to find the easy way out

I'm letting go of all I've known
I never thought I'd say
"There's gotta be a better way"

When everything around me Falls to pieces I've got something more in my life When I'm broken I see Only you complete me Yeah without you by my side I fall to pieces every time

All my hopes and dreams and All my selfish plans that crumbled in my hands Made me realize I've gotta trust in something Bigger than I am

I'm standing strong when all goes wrong
It's gonna be ok
I've finally found a better way

When everything around me Falls to pieces I've got something more in my life When I'm broken I see Only you complete me Yeah without you by my side I fall to pieces every time

A flower that's fading Disintegrating You're patiently waiting for me

When everything around me Falls to pieces I've got something more in my life When I'm broken I see Only you complete me Yeah without you by my side I fall to pieces every time (2x)
