Maybe It's a Good Thing

Kt Tunstall

All this choosing wrongs and losing ground Often feeling lost, just roll it out

But I'm looking for a love, not a heartache Yes I'm gonna take my time Even though I know from the handshake If I wanna make you mine I am walking blind Maybe that's a good thing Maybe that's a good thing That I can't see what's coming And I don't run scared Life will become one big stupid youth again Maybe it's a good thing

Tempo me with dignity today Ever choose your silver through my veins

Looking for a change in my makeup Break apart and start again I will ask a question You will win my heart with it

I will send you a sign Maybe that's a rare thing Maybe that's a rare thing When a light comes blinding And I sob for days I'll always remember the time you sat next to me and you sang Maybe it's a good thing When a light comes blinding And I sob for days I'll always remember the time you sat next to me and you sang Maybe it's a good thing Maybe it's a good thing
