

Cannibal

Kublai Khan

God bless Texas

I will not be the one to become
A tool of choice for a voice I can't stand
Who the fuck are you
To choose what's true or what the fuck to do
Trust runs cold
In this fucking war to rule
You stand before my eyes
Fuck you
Passing over power to the lowest form of animal
Cannibal
Limp dick and irrational
When the path turns into nightmares
Where we once were is no longer
Look at what we've done
Stuck in a wheel you can't outrun
Pushing your lies into my life
Clenching my fist just resist (Resist)
Call me old call me cold but I can't grip
Search for peace in a world where I don't fit

Breaking through in these unsure times
Enemies of the truth realize
What you do what you say defiles
I'll stick by my word when I say fuck you all

When I say fuck you all
Bang the drums of war

I'll run you down before I ever let you break me
Never succumb
Never become
Never be numb
'Til my last fucking breath
