

# Bumblebee

Kula Shaker

Everything is different now but we are still the same  
If we make it out of here I'll marry you again  
I can't change what happened I can only sing this song

Sing with me, Bumblebee

The madmen and the lunatics  
Who stand on feet of clay  
Who slither in their pulpits  
Will soon be locked away  
One love to overcome them  
One love to save the day  
For love is a child of liberty  
For love is a child of liberty

One love to overcome them  
One love to rule them all  
One love to expose them  
One love to smash the walls  
One love to banish demons  
One love to break the chains  
One love to stop the bleeding  
Of your heart and heal the pain

One love to end the darkness  
One love to bring the dawn  
One love to save the future  
For the children yet unborn  
May God's Love be your armour  
And may God's Love be with you  
For love is a child of liberty  
For love is a child of liberty  
For love is a child of liberty
