

## BOMBS AWAY

KxllSwxtch

Hey, bombs away (Bombs away)  
Too much on my mind, think my head's exploding  
Voices in my head, it's kinda hard to feel lonely  
Wanna let it bang inside my brain (Inside my brain)  
The thought of my own life is getting hard for me to stomach  
So I'ma look away from all my problems, keep running  
And running, and running

Day after day, livin' life in a fade  
Everything that brings me joy brings pain  
All the things I hated once, I became  
All I do is hurt people, I don't wanna  
Go outside and see everybody's faces, it  
Bothers me just to watch everyone fakin' it  
Close my eyes and imagine the world vacant, dead  
Or alive either way it's all the same in the end

Tomorrow begins  
With or without you there

Hey, bombs away (Bombs away)  
Too much on my mind, think my head's exploding  
Voices in my head, it's kinda hard to feel lonely  
Wanna let it bang inside my brain (Inside my brain)  
The thought of my own life is getting hard for me to stomach  
So I'ma look away from all my problems, keep running  
And running, and running
