

# Think About You

Kygo

We've been quiet  
Said we'd try it for a while  
But that was years ago

If you see me, if I see you, mmm  
A part of me hopes that we do, no  
Say everything we wanted to  
After all this time

I cut the tree down that we grew  
You know the one we carved our names into?  
Still I can't go back to the places we knew  
'Cause they ask me if I still think about you  
Only all the time

I still think about you, think about you  
Only all the time, mmm  
I still think about you, think about you  
Only all the time  
Only all the time  
I still think about you, think about you  
Only all the time

I still think about you, think about you  
Only all the time  
I still think about you, think about you  
Only all the time

Hometown drivin', autopilot  
My phone's on silent  
In case you call

If you see me, if I see you, mmm  
A part of me hopes that we do, no  
Say everything we wanted to  
After all this time

I cut the tree down that we grew  
You know the one we carved our names into?  
Still I can't go back to the places we knew  
'Cause they ask me if I still think about you  
Only all the time

I still think about you, think about you  
Only all the time, time, time, time  
I still think about you, think about you  
Only all the time

I still think about you, think about you  
Only all the time  
I still think about you, think about you  
Only all the time  
I still think about you, think about you  
Only all the time  
I still think about you, think about you  
Only all the time
