

The Hurt I'd Go Through

Kyla

A moment in time
Belonged to our chemistry
In a world so far away from here
Created by dreams

You made my earth move
Brought sunshine through your smile
Tell me what am I to do
You never warned me about
All the hurt I'd go through for you

Listen, can you still
Hear the love we made
Softly, gently
To the music we played
As you showed me the way

You made my earth move
Brought sunshine through your smile
Tell me what am I to do
You never warned me about
All the hurt I'd go through for you

And now I'm all alone
Abandoned by the only dream
I'd never ever really known...
I'm slowly breaking down

Our world, our home
Burned by reality
Warmed turned stone cold
As darkness appears
And life's taken from me

You made my earth move
Brought sunshine through your smile
Tell me what am I to do
You never warned me about
All the hurt I'd go through for you
