

Here For Me

Kyle Hume

You got me wrapped around your fingers
I can't seem to get you off my mind
Everybody says you're no good
I ignore them all 'cause I just have to try
Fourth time on a Friday night
I've seen you here and I can't even say hello
Too mysterious, I'm all delirious and I just really need to know

Are you here for me?
Are you here for me?

Deep blue eyes, might be your best disguise
They're such a sneer 'cause I can't look away
Honestly I don't believe a single word you said
When you told me to stay
Told me, keep this on the low
Don't let nobody know
Shut your mouth and toss the key
Say you'll stick around, that you won't let me down
'Cause I'm too scared to wait and see

Are you here for me?
Are you here for me?

Think you're up to something
Don't leave me here with nothing
Can you please just ease my mind
'Cause they got me believin'
That you got different reasons
I'm trying not to waste my time

Are you here for me?
Are you here for me?
