

I Don't Think We Landed On The Moon

Kyle Hume

I don't think we landed on the moon
2 + 2 was always 4
But now I'm not so sure that's true
And I'm wondering if the sky is really blue
Yeah, I knew it all before
But now I'm not sure if I do because of you

You said you loved me now where you at
You were my whole world but now it's gone flat
You were the one thing I knew for fact
So where you at

Now I, I question everything
Was every kiss just a conspiracy
Oh, a lie, a lie that you made me believe
Look what you did to me
Oh I, I question every word
That I love somebody you never were
Now I, oh I
Can't believe anything anymore

Trusted every promise from your lips
Told me that you fell for me
And I just went and fell for it
I don't even think real love exists
'Cause I thought it's what we had
But now I know it's all a myth because of you

You said you loved me now where you at
You were my whole world that now has gone flat
You were the one thing I knew for fact
So where you at

Now I, I question everything
Was every kiss just a conspiracy
Oh, a lie, a lie that you made me believe
Look what you did to me
Oh I, I question every word
That I love somebody you never were
Now I, oh I
Can't believe anything anymore

If I can't trust you I can't trust myself
Is it real, is it not, how could anyone tell
Oh, I was so stupid, how was I so blind
To believe that you could be the love of my life

Now I, I question everything
Was every kiss just a conspiracy
Oh, a lie, a lie that you made me believe
Look what you did to me
Oh I, I question every word
That I love somebody you never were
Now I, oh I
Can't believe anything anymore
