

Never Know

Kyle Hume

I've got friends
Breaking up every weekend
Back together then leave again
All of them
When they kiss and when it's convenient
But you and me we won't be like them

With all that
Up late but you might miss me
Only stay because our history
Always got something to hide (Oh)
Drying up but nothing changes
Got a feeling we will make it
Wonder what that must be like

But I will never know
Never know
Never know
Never know
I will never know
Never know
Never know
Never know

Oh, I can only imagine
What it'd be like if we didn't last
If anything happened
If you just let me go

But I will never know (Never know)
Never know (Never know)
Never know (Never know)
Never know (Never know)
I will never

Understand
How you know that the one and let him slip right through your hands
Through your hands
I will never see the boy
And putting someone first and feeling like a second choice
Oh, don't want that

Something wrong but you just can't place it
Waking up and it's 10 years wasted
Makin' up but we can't make it work (Oh)
Day to day but we just can't take it
Safe to say it's not worth saving
That kind of love's gotta hurt

But I will never know
Never know
Never know
Never know
I will never know
Never know
Never know
Never know

Oh, I can only imagine
What it'd be like if we didn't last
If anything happened
If you just let me go

But I will never know (Never know)
Never know (Never know)
Never know (Never know)
Never know (Oh)
