

You don't know how good you look tonight (I know you don't)
I won't ever get you off my mind (I know I won't)
If we're not together it's just wasted time, so let's go
Somewhere we can just be alone, let's face it
When you give me that look it's like the bass hit
Hit me in the chest, yeah, you know you got me shaking
There ain't no mistaking, it's you, yeah, you know got me
Hanging on to every move, you make it something that I'd never have
So let's find somewhere that it's just you and I

'Cause it feels so perfect with you by my side
Wish we could just slow down the night
You and me could be our own escape
Forget the world and watch it fall away
We might fall in love but that's okay
'Cause everything will be alright if it's you and me
(You don't know how good you look tonight)
(I won't ever get you off my mind)

You got something special
I don't think I gotta mention
That you're the only one in here
That's getting my attention
Look into your eyes
Already know just what you're saying
No need to explain it
Never met nobody like you
You're one of a kind

And it feels so perfect when I'm by your side
Wish we could just slow down the night
You and me could be our own escape
Forget the world and watch it fall away
We might fall in love but that's okay
'Cause everything will be alright if it's you and me

So come with me, let's go
Somewhere no one else would know
We could run away for the night
Come with me, let's go
Somewhere no one else would know
Yeah, you make me feel so alive

You and me could be our own escape
Forget the world and watch it fall away
We might fall in love but that's okay
'Cause everything will be alright if it's you and me
(You don't know how good you look tonight)
(I won't ever get you off my mind)
(You don't know how good you look tonight)
(I won't ever get you off my mind)
