

## Something To Me

Kyle Park

Going through my daddy's vinyl, spinning songs on his machine  
Coming from two worn out speakers, but it sounded good to me  
And it sure seems wrong that most sad songs and waltzes never sell

'Cause in my heart they're still alive and well

Some folks believe that country music's dead and gone  
That nobody wants to hear them old forgotten songs  
But every single note is wrapped around a memory  
That still means something to me

Picking songs out on the back porch with my old broke down guitar

It's so crazy how a melody can heal a heart  
Never let down by the sound of "I'm So Lonesome I Could Cry"  
Yea I'll take old school C&W every time

Some folks believe that country music's dead and gone  
That nobody wants to hear them old forgotten songs  
But every single note is wrapped around a memory  
That still means something to me

Yea every single note is wrapped around a memory  
That still means something to me
