

I need a reason
For sneaking up outta this house
Pop a window so no one finds out (uh uh)
I'm feeling something
Between us about to go down
So come see what I'm all about (uh uh)

Got your lips on mine up against your car
And the street lights buzzin' just like we are
It's a short ride home but we'll take it far
So put it in park
Let's stay right where we are

Hands on me when I feel my denim
It's so bad that I might just let him
Got him sprung by the way I fit em
(Uh ah uh ahh)
Hands on me when I feel my denim
It's so bad that I might just let him
Gate keep me baby please don't tell em
(Uh ah uh ahh)

Youthful type of indiscretion
Like you never learned your lesson
Materials from overseas, you probably
Thinking it was made from heaven
But I'm classically fashioned
Your favorite habit
I don't mean to be dramatic
But it's the best you ever had it

Got your lips on mine up against your car
And the street lights buzzin' just like we are
It's a short ride home but we'll take it far
So put it in park
Let's stay right where we are

Hands on me when I feel my denim
It's so bad that I might just let him
Got him sprung by the way I fit em
(Uh ah uh ahh)
Hands on me when I feel my denim
It's so bad that I might just let him
Gate keep me baby please don't tell em
(Uh ah uh ahh)
