

Alone Again

Kylie Minogue

There's no escape from that choice
We're miles away
So sad to say goodbye to you

We stand alone from the day we're born till the day we die
This is the law of nature
We cannot escape from the loneliness though many men have tried
To take away the pain we always feel the same

Alone again
Haven't we been here before
Alone again
I don't know how will survive
Alone again
Now we're back where we started
Alone again
I thank God I'm alive
