

At The End Of The Day

Kylie Minogue

See me
See me
See me there now

See me
See me
See me there now

See me
See me
See me there now

See me
See me
See me there now

Tell me your not alone
I could do with a helping hand
Should've remember I'll feel this way
When you were around
Just when I thought I never fear
When you took your loving away
Left me to wonder if I ever feel the magic again

But while there's beauty still surrounding me
It's my devotion that is astounding me
Can't you see, that with me
That we could be happy
Till the end of time

At the end of the day, we could throw it all away
Start over again
At the end of the day, we could throw it all away
Star over again (it's only love)

Should have been for always
Don't wanna be some kind of friend
Rain or shine it's always eternal love that's safe

But while there's beauty still surrounding me
It's my devotion that is astounding me
Can't you see, that with me
That we could be happy
Till the end of time

At the end of the day, we could throw it all away
Start over again
At the end of the day, we could throw it all away
Star over again (it's only love)

At the end of the day, we could throw it all away
Start over again
At the end of the day, we could throw it all away
Star over again (it's only love)

But while there's beauty still surrounding me
It's my devotion that is astounding me

Can't you see, that with me
That we could be happy
Till the end of time

At the end of the day, we could throw it all away
Start over again
At the end of the day, we could throw it all away
Star over again (it's only love)

At the end of the day, we could throw it all away
Start over again
At the end of the day, we could throw it all away
Star over again (it's only love)

At the end of the day, we could throw it all away
Start over again
At the end of the day, we could throw it all away
Star over again (it's only love)

At the end of the day, we could throw it all away
Start over again
At the end of the day, we could throw it all away
Star over again (it's only love)
