

Supernova

Kylie Minogue

Shining like a supernova
Brightest of the stars
From another galaxy
Like Jupiter and Mars

A thousand light years
You call to me
It's supernatural
Your energy
New horizons
New galaxy
I'm coming for ya
Your gravity
Oh

Bring it back, bring it back like a rocket
Bring it back, bring it back, never stop it
Bring it back, bring it back, start ignition to your heart
(3-2-1)

Baby, all I need
Is just a little bit of your starlight (bit of your starlight)
Shining on me
I never knew an aura was so bright
So bright, ooh
Shining like a supernova
Brightest of the stars (the stars)
From another galaxy
Like Jupiter and Mars
Baby, all I need
Is just a little bit of your starlight
You're my supernova

There ain't nobody on planet Earth
The way you got me
I'm on my way to your dimension
You know your spaceship
Baby, take me there
It's so electric
You can't compare
Oh

Bring it back, bring it back
Like a rocket
Bring it back, bring it back
Never stop it
Bring it back, bring it back
Start ignition to your heart
(3-2-1)

Baby, all I need
Is just a little bit of your starlight (bit of your starlight)
Shining on me
I never knew an aura was so bright
So bright, ooh

Baby, you

Brightest of the stars
Jupiter and Mars
Ohhh no

Shining like a supernova
Brightest of the stars
From another galaxy
Like Jupiter and Mars
Shining like a supernova
Brightest of the stars (the stars)
From another galaxy
Like Jupiter and Mars

Baby, all I need
Is just a little bit of your starlight (bit of your starlight)
Shining on me
I never knew an aura was so bright
So bright, ooh
Shining like a supernova
Brightest of the stars (the stars)
From another galaxy
Like Jupiter and Mars
Baby, all I need
Is just a little bit of your starlight
You're my supernova
