

## Let Go

Kyprios

Let go, of my diamond in the metro  
Rose pedal in a ghetto  
Noveau becoming retro  
Love is the rearview, nothing but an echo  
Still I know u shine bright  
Burning in the lime light  
The war is over why fight?  
Clock told the truth so I knew that the time's right  
It's over for the her and me  
I told her never hurry me  
If love was a currency?  
Currently we're broke with no hope for a new relief... so

U know ur beautiful  
I always told you so  
Baby hold on tight cause  
I gotta let u go  
The news becoming old  
Can't give you what u want  
Maybe one more night then  
I gotta let u go

You, entertaining individual  
Me, immature but indivisible  
Us, easy was so difficult  
Ladybug and Butterfly but it wasn't Digable  
No, Planets weren't aligned right  
Oh, could never get them signs right  
So, Cancer in a catfight  
With a Leo but u need to know I'm gonna feel the bite  
Of course I'm gonna wonder who  
Makes u feel high like the sun rise under you  
Under blue skies, under new eyes  
Understand under the truth, u know I ain't over you  
Overdue when our lovin' is overproof  
Over you I get more open than a vocal booth  
Hopin' the truth is leaving soap in the wound  
Clean break got me open but you know that I'll be closing soon
