

Between Us

Kyson

You see that, we seem stuck
The break lights, we lean on
They feel right between us
But it feels right between us

The crow swoops
The love pays
The eyelids
That roll back
The deep scars
From these years
They feel right between us

It feels right between us
It feels right between us
It feels right between us
It feels right between us

Since then
We lost time
Your not shy
Like my kind
The love morphs
The love morphs
The distance it keeps talking

Those scars from these years
A coal mine
Tonights fears

They feel right between us
But it feels right between us

It feels right between us
It feels right between us
It feels right between us
It feels right between us
