

Down Day Drag

L.A. Guns

From New York City down to Tokyo
It's all the same
Look in the mirror and see your face
It all looks strained
You keep your head up, you've had enough
Tell the man
It's when you see your words don't matter
It's in his hands

Understand, my righteous friend
All your plans will never be
You don't care, you never did
All my life has been so wasted it's a down day drag
You'll never know the pain is something that I've always had
All my life has been so wasted it's a down day drag

Now it's time for all to see
The program line
No sense in running, nowhere to go
It will happen all the same

Understand, my righteous friend
All your plans will never be
You don't care, you never did
All my life has been so wasted it's a down day drag
You'll never know the pain is something that I've always had
All my life has been so wasted it's a down day drag

Understand, my righteous friend
All your plans will never be
You don't care, you never did
All my life has been so wasted it's a down day drag
You'll never know the pain is something that I've always had
All my life has been so wasted it's a down day drag

Understand
Down day drag
Down day drag
Down day drag
Down day drag
Down day drag
Down day drag
Down day drag
Down day drag
Down day drag
