Alright

LAB

I just keep wandering though my head is hung low
Just like the setting of the sun and the beautiful moon, they c
ome close
Show me the light and everything is alright
Just trust in me, brothers and sisters, and soon you'll see
That your dreams are more than just fantasy, hey

When the days are gettin' colder
Come with me, I'll keep you warm
I'll still hold you when you're older
I'll still hold you when you fall

It feels like my world is on fire
I'm so scared of being on my own
I've never cheated (On you)
I couldn't do it (To you)
And now I sleep alone, if you only knew
Show me the light and everything is alright
Just put your trust in me, brothers and sisters, and soon you'l
l see
That your dreams are more than just fantasy, hey

When the days are gettin' colder
Come with me, I'll keep you warm
I'll still hold you when you're older
I'll still hold you when you fall

When the days are gettin' colder
Come with me, I can keep you warm
I'll still hold you when you're older
I'll still hold you when you fall, oh, yeah
