

Midnight Summer

LAB

Hey, yeah
I know you got it all
It's that whole thing in music when you hear it come along

No one can hold you down
Let's go on through the night
Feel your feet up on the ground, singing
And I got a feel when you love all over me
Hey, yeah
Take in another breath
It's that feeling you get when the music hits your chest, singing

Everybody, let's come together
Put your hands up baby
Walk through the rain
Midnight summer
'Cause I got the feeling
Put your hands together
Go through the night
Yeah, walk on

Girl, we could do no wrong
It's just you and me, baby
Listening to this song

And no one can hold us down
Let's go on through the night
Feel your feet up on the ground, singing
And I got a feel when you love all over me
Hey, yeah
Take in another breath, baby
It's that feeling you get when the music hits your chest, singing

Everybody, let's come together
Put your hands up baby
Walk through the rain
Midnight summer
'Cause I got the feeling
Put your hands together
Walk through the night
I said, walk on

I can hear the music playing
Into the night
Take my hand and ride with me
Summertime baby
I can hear the music playing
Into the night
Take my hand and ride with me
Summertime baby

You got to make it babe
So walk on
Into the night
Into the night
