

See The Light

LAB

Have you heard the news?
She found another man
He is oh so beautiful
Too good to let go
She's gonna chase the man
To her motherland
Gonna find the reasons why
He's not in love with her
When all the colors fade away

Headed for wonderful
Walking through the night
When you go down that road, take a look around
I can feel, baby, you've been there before
And in time you realized what love is all about

When all the colors fade away
What will you do to me?
When all the colors fade away

You take time to think about your love catastrophe
Girl you know you are a wild one
Baby just don't forget
How long can you live
This reality?
Living life through the blinds
Hoping to see the light
When all the colors fade away

Love don't come easily
Love don't come easily, oh no
Love don't come easily
Love don't come easily, oh no
Love catastrophe

When all the colors fade away
What will you do to me?
When all the colors fade away

Love don't come easily
Love don't come easily, oh no
Love don't come easily
Love don't come easily, oh no

Love don't come easily
Love don't come easily, oh no
Love don't come easily
Love don't come easily, oh no

Love don't come easily
Love don't come easily, oh no
Love don't come easily
Love don't come easily, oh no
