

# What The Hell

LAB

You own the world, that's what I know  
Use me like your own  
When we're alone, I feel emotion tearing me apart  
I feel your hands, graced over me  
You're burning me inside  
It's one on one, can we make three and take me on that ride

Girl can you wear a diamond bling, shiny eye with the golden ring  
Hear me out when I want to sing, can you hear me, come give it to ya

Can I undo wrong done to me, and make a one night stand  
Just like a star shines in between  
Cause baby I want more

I feel your temper bed of emotions, fire on the sheets  
This is a night, I will remember  
You make my heart run free

Girl can you wear a diamond bling, shiny eye with the golden ring  
Hear me out when I want to sing, can you hear me, come give it to ya

Hey girl can you hear me sing, shiny eye with the golden ring  
Hear me out when I wanna sing, can you hear me baby  
Shine on with the golden bling, make love underneath the sheets  
It's time I can turn you on, I know you're ready
