Come with me If you believe Come with me If you believe The phases of the moon Are changing much too soon We'll be devoured by the sun And if you find me there Protect the love we shared Pretend you never cared and carry on And sing the song Come with me If you believe Chameleon sing and pray That they will see the day That night falls And colors set them free It's such a crazy game (if you believe) Your sighs, your face, your name Determines who's the same Should we make believe That I do believe That I've been decieved?

We lived on distant shores
Until we yearned for more
Opened our hidden doors and followed through
Now that we've seen your light
We know the time's not right
Chameleons seek the night before the dawn

I do believe
That I've been decieved

I do believe
That I've been decieved
Come with me
If you believe in the magical world
If you believe in the magical world
