

## Another Year

Labi Siffre

We started well - I looked at you you looked at me  
We fell into that dream it wasn't hard for me to do, you were lovely  
And I hardly even knew I was laughing all over my face  
'Cause you were laughing and you brightened the place  
Now here we are, we've come this far

Another year has gone  
And here's another one  
What are we going to do  
Will it be something new?  
Will it be good?  
Will it be good for me and you?

This is just what love should be and I know that always  
I'm never sorry, I can't imagine how I lived without you  
I think I shared the life that lonely people do  
And now we share each other

Another year has gone  
And here's another one  
What are we going to do  
Will it be something new?  
Will it be good?  
Will it be good for me and you?

Only time will tell  
If we will use it well  
Looking at me, what do you see, do you agree?  
Looking at you I see everything I could need
