

Love Song For Someone

Labi Siffre

I know you love me
I love you too
It's very easy
For me to do

Call my name, you're calling my heart
It's just the same
How did I live before you came
It's easy to see why I love you

When people see me
They just don't know
They're only seeing
Half of the show

When you're here with me
The rest of the world seems to disappear
There's really no need to explain to you
You're feeling the same way that I feel

If you should leave me
If you should go
I'll always love you
You'll always know

A song is a way of saying
Things one would never say
That's why I'm writing this today
This is my love song for someone
