

Something On My Mind

Labi Siffre

There's something I've got to say, and it won't wait
I've got to say it right away; it won't take much time
Just a little something on my mind. I'm not much good with words

And when I harmonize, I always harmonize in thirds

I'm not much good at games, and I can't remember names, speaking of my nose

I'm well aware, that it's crooked, my eyes, really don't hypnotize

When you're in my arms, I can't believe you feel lighter

You see, I'm really not much of a prize. It's funny how my brain, usually slow or inactive

Has of late, supplied me with many ideas, I just think of you
And I'm a world of emotion, for me, there's really just one thing to do

You've got to tell me yes or no, should I stay or should I go?

There's no need to be kind, just say what's on your mind
