

You And I Should Be Together

Labi Siffre

I don't know just how you're feeling
But I know you and I should be together

I don't know just where you are
But I know you and I should be together

I would have thought that after all this time
I could get over you
But day after day passes me by
And I want you more, and hard as I try
I still love you more, love you more

I don't know just how you're doing
And I wish I could say
That I hope you're doing fine
But I need your love
So I hope you're feeling sad
'Cause maybe then you'll decide
That you need mine
You and I should be together
