

# Hours

Lady Leshurr

I got the fire for the tank, sipping on that drank  
Thinking bout some things, I don't give a give a uh about what you think  
I don't give a uh about what you think, it's nothing but a thing  
So just fade out and live, pour it up, drink  
Pour it up, drink, hurry up, think  
Got a cutie on my line so just call me up quick  
I just performed on the stage and I tore it up, rip  
Had to prove I was the one and sure enough, did  
And sure enough I did it, forgive me for giving any  
The love my blood is within it, and stupidity, I forbid it  
The beauty is in my lyrics, I'm ruthless but I've got spirit  
My mummy said if I want it I have to go out and get it  
So now I'm out I'm pursuing, my album out near by June  
And I'm counting down till it's true cause I'm shouting out that I'm due  
To be one of the gyal to conquer, ain't acting, deserve an Oscar  
Need practice before you prosper, I'm acting just like a monster  
I'm that ill, I need a doctor, in fact I will do the honours  
I'm back to being so modest cause actions are never honest  
Attacking any track, I am the baddest to ever follow  
Mike Jackson, even Madonna, fantastic deserve a scholarship  
And honestly I don't really have anything to say  
I'm going through a dilemma, now I'm feeling kinda faint  
Got too many things that's happening going on in my brain  
And now I'm going insane and now I feel it's a shame  
And now I know it's insane, real love it ain't a game  
It's power within the pain, and I don't know what to say  
For hours I feel the ache, for hours throughout the day  
There's a lot of people doing it a lot of people ain't  
Sometimes I wanna go, sometimes I wanna stay  
Sometimes I wanna get up at times and run away  
But I'll never ever leave your mine forever stay  
So I'll just let it breathe and I'll call it another day

I know what to do today  
I just wanna see you for hours  
I know you gotta work today  
But I just wanna see you for hours and hours and hours...

I got that fire for the tank, sipping on that drink  
Thinking bout some things, I don't give a uh about what you say  
I don't give a F about what you say, I'm gonna do it anyway  
So just fade out its ok  
Live it up, rave  
Live it up, rave  
It lifts me up, raise  
Got a cutie by my side who wants to pick me up, great  
And I just headlined a show so they give me love praise  
I'm tryna make it to the top so wish me luck, babes  
They wish me luck and praise me, the love I get its so crazy  
The energy is what makes me, get more drive than a Mercedes  
Negativity don't phase me, might love me you might just hate me  
And I woke up to reality only to chase my daydreams  
Cus I really know it's worth it  
And Practice it does make perfect  
My actions turn into words  
It's a fact that I'm a girl that has passion more than a purpose  
Make bangers without no cursing

Hit tracks I call them a circuit  
No acting don't need rehearsing  
I'll sack it, I get to working  
I capture, I'm picture perfect  
Reality is a surface  
Morality is the worse  
And it battles my every word  
It's a sanity of my birth  
Epicality is the curse  
And my salary's with the birds  
And actually I don't really have anything to do  
I'm going through a dilemma now I'm feeling kinda crude  
Got so many things that's happening going on in my view  
And now I know what to do  
In hours I'm gonna prove  
To cowards I'm on route to power money respect  
If I drop I'll dust off and will carry on protect  
Even though a step ahead I'm bound to fall up the stairs  
About to be what they're scared of Halloweening again  
Sometimes I wanna go, sometimes I wanna stay  
Sometimes I wanna get up at times and run away  
But I'll never ever leave your mine forever stay  
So I'll just let it breathe and I'll call it another day

I know what to do today  
I just wanna see you for hours  
I know you gotta work today  
But I just wanna see you for hours and hours and hours...

I see purple flowers, yeah  
And I know that you love me  
I see purple flowers, yeah  
And I know that you love me
