

Single Life (Interlude)

Lady Wray

You know sometimes it gets lonely
But I love living the single life
You don't have to answer to nobody
You call your own shots
The single life is the life

I'm living the single life, single life with no one
No one to answer to if I don't come home, feel me
I'm living the single life, single life with no one
To tell me when I can go out and how long to be down

This is for my single women
With two jobs, no kids, one house and call the shots
If it's good for you ladies, if it's good for you ladies
