

# The Grudge

Lady Wray

Love made its way to my heart  
Took out all the bad parts  
The pressure turned me around  
How precious life can be  
I got this brand-new thing  
New style, new victory  
Nobody can hold me down

I'm letting the grudge go  
I love this new flow  
The weight was holding me down, me down. me down

Don't you know that love lifted the grudge  
Took that from me, took that from me  
Don't you know that love lifted the grudge  
Took that from me, took that from me  
Don't you know that love lifted the grudge  
Took that from me, took that from me

I used to hold all the bad memories  
They used to burn me like 300 degrees  
Was lost wanted to be found  
How mean people can be  
And how they made me get off my game  
I sat around and let 'em beat in my brain  
Don't wanna end up living life so cold  
So I begin to let go

I'm letting the grudge go  
I love this new flow  
The weight was holding me down, me down. me down

Don't you know that love lifted the grudge  
Took that from me, took that from me  
Don't you know that love lifted the grudge  
Took that from me, took that from me  
Don't you know that love lifted the grudge  
Took that from me, took that from me

Once I was lost now, I'm found  
Removed the grudge, it turned me around  
Brand new life now I see  
Love is now part of me  
Once I was lost now, I'm found  
Removed the grudge, it turned me around  
Brand new life now I see  
Love is now part of me

I'm letting the grudge go  
I love this new flow  
The weight was holding me down, me down. me down

Don't you know that love lifted the grudge  
Took that from me, took that from me  
Don't you know that love lifted the grudge  
Took that from me, took that from me  
Don't you know that love lifted the grudge

Took that from me, took that from me  
Don't you know that love lifted the grudge  
Took that from me, took that from me  
Don't you know that love lifted the grudge  
Took that from me, took that from me  
Don't you know that love lifted the grudge  
Took that from me, took that from me
